Attachments: John Meunier - Site Visit Proposal.pdf

Hi Mayor:

Per our phone conversations, please reference the attached proposal from Veolia Water Technologies. Veolia is the supplier of the existing Rotarc Fine Screen, Mectan Grit Chamber, and SAM grit screw in the existing headworks at the Conrad wastewater treatment facility.

Veolia is proposing to visit the site to inspect the existing equipment and make a recommendation for maintenance, upgrades, or replacements needed.

Completion of this inspection could result in repair or maintenance instead of full replacement; potentially saving the project a considerable amount of money.

We therefore recommend performing this inspection.

If approved by the City, they would like to visit Conrad during the week of August 3rd.

If the proposal can be considered in next week's council meeting that would be great.

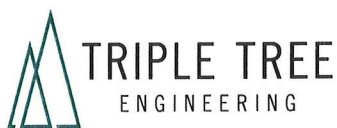

This can either be paid directly by the City, or billed through Triple Tree. Either way, it will be an eligible cost for your wastewater project.

Please let me know if you have any questions.

Thank you,

Brad
